DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3-29-2005 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Paul Morico on April 8, 2005.

The application has been amended as follows:

Cancel claims 19-25.

Remarks: Claims 19-25 are cancelled. The applicant elected without traverse to prosecute claims 1-18. Claims 19-25 are non-elected invention.

Prior art cited

3. Glassey (U.S. Patent 5,005,408) discloses an apparatus for monitoring liquid levels using pressure responsive instruments is described, in which an arrangement for compensating for the effects of errors including gas weights errors is provided. The required compensation factor for a particular installation is first calculated theoretically, and then used in order to raise the output signal of the instrument electronically by the calculated factor. In one arrangement, the output signal is amplified by the desired factor. Alternatively, the excitation voltage of the instrument itself, or of a potentiometer used to interface the instrument to electronic data acquisition devices, is varied in order to raise its output voltage by the desired compensation factor.

Allowable Subject Matter

4. Claims 1-18 are allowed.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 10 contain allowable subject matter. None of the prior art of record shows or fairly suggests the claimed invention.

Regarding claims 1 and 10:

The primary reason for the allowance of claims 1 and 10 are the inclusion of the method of determining a corrected weight of a batching tank, the batching tank adapted to receive one or more materials, each material having a density, the batching tank having a weight, a pressure, and a volume, wherein the batching

Art Unit: 2863

tank initially comprises a fluid having a density, the method including the fluid. wherein the corrected weight of the batching tank does not include the weight of the fluid in the tank. It is these features found in the claim, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

Claims 2-9 are allowed due to their dependency on claim 1.

Claims 11-18 are allowed due to their dependency on claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tung S Lau whose telephone number is 571-272-2274.
